Zeeshan Sainch

MERN Stack Developer

Hyderabad, Pakistan | +92 3101314979 | +92 3192604292 | zeeshansiyal579@gmail.com

Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

To contribute my expertise in MERN Stack development and Front-end, I will utilize modern frameworks and technologies to build visually appealing and user-friendly web applications that deliver exceptional user experiences. I bring a strong foundation in JavaScript and React JS, an eye for clean UI, and a genuine interest in writing maintainable, scalable code across the full stack.

SKILLS

- **EXPERTS:** Javascript | Tailwind Css | React Js | React-bootstrap | Rest API | Socket.io | Full Stack Deployment
- **COMFORTABLE:** Express Js | Node Js | MongoDB | Supabase
- **FAMILIAR:** React Js | Tailwind Css
- **TOOLS:** Vs Code | GitHub | Git
- **SOFT SKILL:** Communication | Teamwork | Problem Solving

PROJECTS

AUTHENTICATION Live Link | GitHub

- Developed a complete authentication system using the MERN stack with user signup, login, and secure JWT-based authentication.
- Implemented password reset and email OTP verification using HTTP-only cookies.
- Integrated MongoDB for user data management and deployed the application online.

Technologies Used: React Js | Node Js | Express Js | MongoDB | JWT

Note: *The backend of this project is deployed on a free hosting plan, so signup or other actions may take up to 3 minutes to respond.*

BOOK WEBSITE Live Link | GitHub

- Developed a responsive Book Website using React with a clean and user-friendly interface.
- Implemented book search, loading states, reusable book cards, and dynamic content rendering.
- Added fallback images for books without covers to ensure a consistent and polished UI.
- Structured components for reusability and used Context API to manage state across the app.

Technologies Used: React Js | Axios | React Router | Context API | CSS

COREBIZ Live Link | GitHub

- Developed a modern and responsive CoreBiz business website UI using Bootstrap.
- Implemented a structured Navbar, Hero sections, Footer, and clean reusable UI components.
- Optimized the layout for a smooth, consistent experience across desktop, tablet, and mobile devices.
- Focused on pixel-accurate spacing and cross-browser consistency throughout the build.

Technologies Used: HTML | CSS | Bootstrap

CORE STRENGTHS

React & Component Design:
Building reusable, state-driven React components with clean, maintainable structure.

Responsive UI:
Crafting layouts with Tailwind CSS and Bootstrap that adapt smoothly across all devices.

API Integration:
Connecting front-ends to REST APIs with Axios for dynamic, real-time data rendering.

EDUCATION

2026 | Saylani Mass IT Training (SMIT)

LANGUAGE
